

CORPORATE CAPABILITIES

Secure Intelligence. Scientific Precision. **Mission Advantage.**

Science, technology, and engineering for NASA, NOAA,
and the Department of Defense.

INNOVIM brings scientific expertise, secure technology, and mission experience
together to help federal customers manage complex data, modernize critical
systems, and sustain essential operations.

Innovative Solutions, Flawless Execution.

DEFENSE SUBSIDIARY
Top Secret FCL

A mission partner built on science and engineering

Founded in 2003, INNOVIM, LLC is a Woman-Owned Small Business with 175+ FTEs supporting federal science, technology, and engineering missions. Our experience spans Earth observation, environmental data, enterprise information systems, and national security operations.

We combine scientists, engineers, technologists, and program professionals to address the full mission lifecycle. Our teams connect technical execution with the customer's operating environment, helping modernize systems while preserving the knowledge and continuity essential to mission performance. **INNOVIM Defense Services, LLC (IDS)**, our wholly owned subsidiary, extends this experience into defense missions and holds a Top Secret facility clearance. INNOVIM welcomes prime and subcontract teaming discussions for federal science, technology, and mission-support requirements.

INNOVIM combines a Woman-Owned Small Business parent with a wholly owned defense subsidiary. Contracting credentials and clearances remain specific to each legal entity.

National reach. INNOVIM and IDS personnel work at customer and company locations across the continental United States, Alaska, and Hawaii, supporting missions that operate around the clock.

Why customers choose INNOVIM

Mission understanding. Experience across NASA, NOAA, and defense programs connects technical decisions to the people, systems, and scientific objectives they support.

Disciplined execution. ISO 9001:2015-certified quality management and structured program oversight support consistent delivery and responsive customer engagement.

Practical innovation. Reusable InnoVisions™ capabilities support tailored data integration, analytics, and workflow solutions for mission needs.

Integrated delivery. Data engineering, software development, cybersecurity, infrastructure, and scientific expertise work together across organizational and technical boundaries.

Workforce continuity. INNOVIM reported 96.6% retention across continuing programs in FY24 and FY25, supporting preservation of mission knowledge.

What we do

Our teams combine technical disciplines to address mission requirements across data, software, infrastructure, security, and science.

01

Mission-Critical IT and Cloud Operations

INNOVIM supports the infrastructure that keeps mission systems available and useful. Our experience includes cloud migration, hybrid and on-premises environments, network operations, database administration, storage, and technical support. Teams sustain distributed services and coordinate modernization around operating requirements, including environments requiring 24/7 support.

Cloud migration

Hybrid architecture

Network operations

Infrastructure as code

RELEVANT EXPERIENCE

NOAA CLASS archive operations and cloud migration; NASA mission computing infrastructure.

02

Data Engineering, Science, and AI Analytics

We engineer data pipelines and environments that help customers ingest, validate, organize, discover, and use complex information. Work includes metadata standardization, integration, scientific data distribution, analytics, and artificial intelligence and machine learning (AI/ML). Our teams connect data services with the needs of researchers and operational users.

Data integration

Metadata

Data quality

Scientific analytics

AI/ML

RELEVANT EXPERIENCE

NASA EED-3 metadata and data services; NOAA LEARN² machine-learning development.

03

Software and Systems Engineering

We design, integrate, test, and sustain software and systems within federal mission environments. Teams apply Agile delivery, DevSecOps, automated testing, and infrastructure as code to improve repeatability and support controlled change across legacy applications, cloud services, and containerized environments.

Agile delivery

DevSecOps

Systems integration

Automated testing

RELEVANT EXPERIENCE

NASA EED-3 deployment engineering; IDS support to USAF Kessel Run application modernization.

04

Cybersecurity, Risk Management, and Compliance

Our cybersecurity professionals integrate risk management with engineering and operations. Experience includes the Risk Management Framework, authorization support, vulnerability management, security configuration, identity and access controls, and continuous monitoring. We help customers connect technical findings to corrective action and maintain evidence for security oversight.

RMF and authorization support

Vulnerability management

Identity controls

Continuous monitoring

RELEVANT EXPERIENCE

IDS cybersecurity support on NORAD NISSC II and MDA IRES.

05

Sensing Systems and Instrument Support

INNOVIM supports the scientific data and computing environments associated with Earth observation and environmental instruments. Our work connects instrument data, calibration and validation activities, ground processing, and scientific analysis with mission users and research objectives.

Earth observation

Calibration and validation

Ground processing

Science data

RELEVANT EXPERIENCE

NASA HBG/ICESat-2 and NOAA satellite and scientific support programs.

06

Weather, Water, and Climate Decision Systems

Our scientific and technical teams support weather, water, climate, and space-weather missions. Work connects observations and environmental data with modeling, analysis, forecasting support, and decision systems. Scientific program services, technical coordination, and stakeholder communication help customers translate research and operational information into useful outcomes.

Weather and climate

Space weather

Modeling and analysis

Decision support

RELEVANT EXPERIENCE

NOAA scientific support and LEARN² extreme-precipitation forecasting development.

Program management and quality connect these capabilities through workforce coordination, resource planning, structured oversight, logistics, and administrative support.

RESULTS

Proven support for NASA and NOAA missions

Moving an environmental archive to the cloud

NOAA CLASS
INNOVIM AS SUBCONTRACTOR

REQUIREMENT	Modernize access and storage for a large environmental data archive while protecting the integrity of its holdings.
APPROACH	As a subcontractor supporting the Comprehensive Large Array-data Stewardship System (CLASS), INNOVIM supported archive operations and executed cloud migration work, including transfer and integrity checks.
PROOF POINT	Migrated 15 petabytes and more than 700 million files to AWS in 186 days.
BENEFIT	Established cloud storage for a major archive holding while preserving the data needed for continued stewardship and access.

Connecting researchers with Earth science data

NASA EED-3
INNOVIM AS SUBCONTRACTOR

REQUIREMENT	Evolve Earth science data services so researchers and mission stakeholders can discover and use distributed scientific holdings.
APPROACH	As a subcontractor supporting NASA's Earth Observing System Data and Information System (EOSDIS) Evolution and Development 3 program, INNOVIM contributed to metadata standardization, data services, cloud deployment automation, and Earthdata operations. Work included the Unified Metadata Model and Harmony services.
PROOF POINT	Supported the development and operation of services connecting Earth science data discovery, processing, and access.
BENEFIT	Helped make scientific data more consistent and usable while supporting the evolution of NASA's cloud-based data environment.

Scientific depth beyond data platforms. INNOVIM's NASA HBG/ICESat-2 and NOAA scientific support experience connects computing infrastructure, scientific analysis, and program execution with the needs of mission teams.

RESULTS

Defense expertise through INNOVIM Defense Services

INNOVIM Defense Services, LLC (IDS) supports defense customers through systems engineering, secure infrastructure, cybersecurity, software modernization, and mission operations. Our wholly owned subsidiary holds a Top Secret facility clearance and brings experience supporting government mission environments.

NORAD NISSC II

SUBCONTRACTOR

REQUIREMENT

Sustain systems supporting integrated tactical warning, attack assessment, and space missions.

APPROACH AND PROOF

IDS personnel supported mission systems, networks, cybersecurity, and operational sustainment, including risk-management and authorization activities.

BENEFIT

Connected engineering and security support with the continuity requirements of critical defense operations.

MDA IRES

SUBCONTRACTOR

REQUIREMENT

Support a distributed enterprise serving missile-defense engineering and operations.

APPROACH AND PROOF

On the Integrated Research and Development for Enterprise Solutions program, IDS supported enterprise infrastructure, network and database services, cybersecurity, and operations.

BENEFIT

Brought coordinated technical support to complex, geographically distributed mission environments.

USAF Kessel Run

SUBCONTRACTOR

REQUIREMENT

Modernize tactical applications and support secure, repeatable software delivery.

APPROACH AND PROOF

Supporting Kessel Run Data Science Services, IDS supported migration of 12 tactical applications to a Kubernetes environment and applied automated testing and deployment practices.

BENEFIT

Supported application modernization and repeatable delivery within mission operating constraints.

These are past-performance references describing work performed by IDS as a subcontractor.

HOW IDS DELIVERS

Systems engineering

Requirements, integration, and sustainment for mission systems.

Secure infrastructure

Networks, computing, storage, and enterprise services.

Cybersecurity

Risk management, authorization support, and monitoring.

Software modernization

Agile delivery, containerization, and automated testing.

Mission operations

Sustainment and operational support for continuous missions.

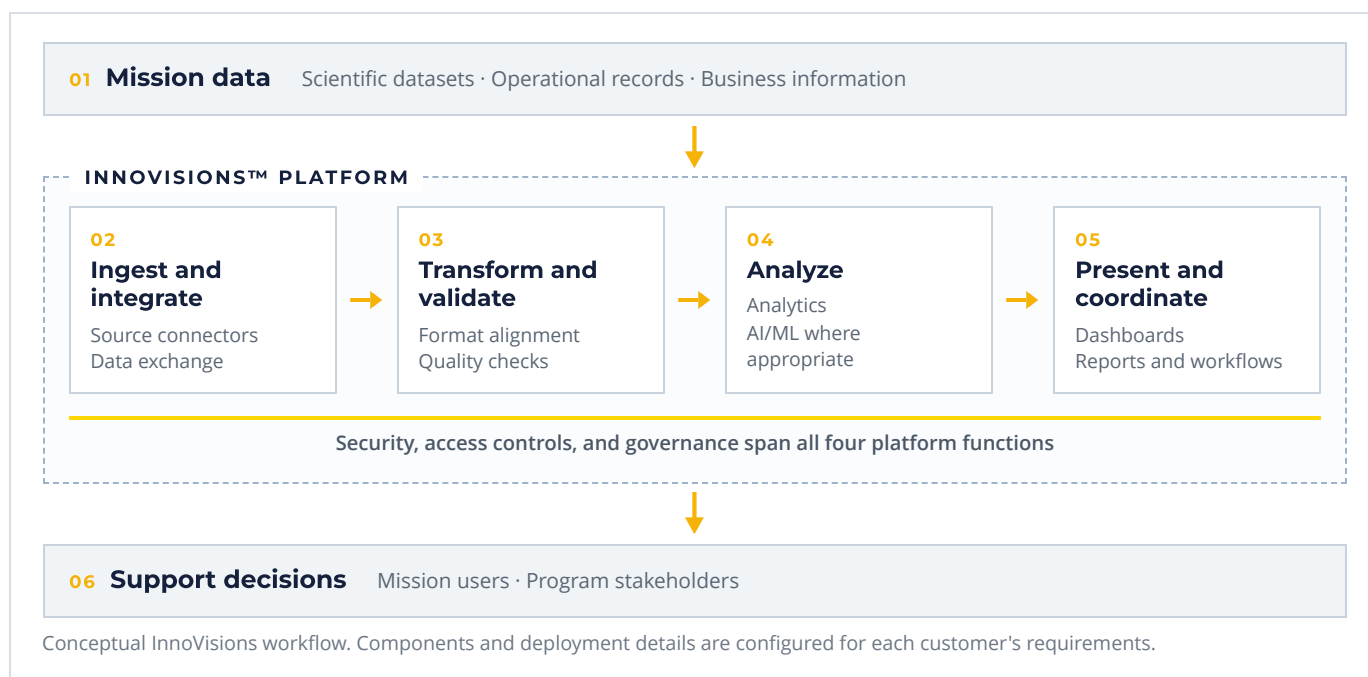

FACILITY CLEARANCE

Top Secret facility clearance held by INNOVIM Defense Services, LLC, with personnel cleared to TS/SCI. Classified processing and storage are performed in government-owned, contractor-operated facilities and government-provided secure enclaves.

InnoVisions™

Connect mission data with actionable insight

InnoVisions is INNOVIM's modular data analytics and workflow platform. It brings data integration, processing, analytics, and visualization together so customers can organize information from separate sources and support mission decisions. The platform provides a foundation for tailored solutions using reusable integration and processing components. Configurable workflows and dashboards help users see the information relevant to their responsibilities, and access controls and governance considerations shape how each solution is configured for its operating environment.

What it enables

Connected information. Ingest and integrate data from multiple sources, with transformation and validation steps that improve consistency and usability.

Workflow visibility. Organize information through configurable workflows, dashboards, and reporting so users can follow status and focus on actionable issues.

Analytics and decision support. Apply analytics and, where appropriate, AI/ML to support interpretation, prioritization, and mission insight.

Mission adaptation. Tailor reusable components to customer data, users, and deployment requirements.

Development experience. NOAA LEARN² Small Business Innovation Research (SBIR) Phase I and II work applied InnoVisions-related capabilities to machine-learning development for extreme-precipitation forecasting. A prototype supporting MDA IRES explored operational data visibility and dashboards. These examples represent distinct development efforts with different levels of maturity.

Explore InnoVisions at innovim.com/innovisions/ or contact INNOVIM to discuss a demonstration.

Work with INNOVIM

Discuss your mission, procurement needs, or teaming opportunity with our leadership team. INNOVIM combines the responsiveness of a small business with experience across complex federal science and technology programs. INNOVIM, LLC and INNOVIM Defense Services, LLC are separate legal entities with separate registrations, clearances, and contract vehicles. Please use the identifiers for the entity that matches your requirement.
